

# The strange white form in the Great Barrier Reef

Lopeo Alexandre 4<sup>e</sup>1

I raised my head and suddenly I saw an enormous white form coming towards me. I thought I was dreaming but no !

I felt stressed because I didn't see it. Instead, I saw many small fish rather than a big fish.

I decided to turn on my flash light and follow it but it swam so fast !

A little time later, I didn't have oxygen anymore, so I was forced to take another bottle.

After 30 min, the white form came back to us and it was a cute beluga!
