# A ROBOT SHARK IN THE GREAT BARRIER REEF

I was swimming in the deep of the reef when I saw an enormous white form coming towards me.

During this time, Chloe had been warned of a shark danger. I was always in the sea.

Chloe called the security to say I was in the water.  
The tourists were leaving the beach.

The security came to save me. I was coming to the border of the reef.

Suddenly, the army commander came to the beach.  
He said it wasn't a shark but it was a robot.

The shark had been turned off. I came towards  
Chloe and the commander safe and alive.

The shark isn't a dangerous animal. We can swim with it. Since 1847 there have been 4 shark attacks in France including 1 fatal.
